

GPS Rack Mounted Amplified 1X16 Splitter Technical Product Data

Features

- Excellent Amplitude Balance

 Less than 1 dB variation between ports.
- Flat Group Delay
 - Less than 1ns variation between L1 and L2.
- High Output Gain
 - 14.0 dB gain is typical across all operating frequencies in the standard configuration.
- Wide Accepted Frequency Range
 - Accepts signals from the entire L-Band, covering all major GNSS constellations.
- Efficiently Blocked Ports
 - \circ Uses 200 Ω resistors to prevent antenna alarm faults from connected devices.
- LED Power Light
- -48VDC Power Option Available
- Durable Rugged Standard 3U Chassis

Description

This Rack Mounted Amplified Loaded DC Blocked Splitter 1X16 (RMALDCBS1X16) is an active one input, sixteen output RF splitter that splits signals from 1.1 GHz to 1.7 GHz and has a formfactor which will fit in a server rack. This equipment is designed to amplify and split signals within the L-band to provide multiple devices with the signal from a single antenna. In the standard configuration, the J1 port will pass DC voltage from a connected device and pass this power to the antenna or other devices upline from the splitter through the antenna port. The other ports (J2-J16) are DC blocked and loaded with 200Ω resistors to simulate antenna current draw which prevents antenna alarm faults. Custom gain configuration, DC configuration, and connector configuration are available upon request. With the larger form factor, we are able to add additional equipment to meet requirements not included in the default device at an additional cost and lead time.

Use Cases

- Splitting and amplifying a roof antenna signal between 16 GPS/GLONASS/GNSS receivers.
- Splitting and amplifying an antenna signal to 16 passive antennas to re-radiate a large facility.
- Usable as a small part of a larger signal distribution network.

RMALDCBS1X16 Electrical Specifications, TA=25°C

General Specification

Parameter	Notes	Min	Тур	Max	Unit
Frequency Range	Covers all major GNSS constellations.	1.1		1.7	GHz
Characteristic Impedance	Unused ports should be terminated with 50Ω loads.		50		Ω
Req. DC Input V.	Operating voltage range for non-networked units.	3.3		15	VDC
Current Draw	Typical current consumption.		76		mA

GPS L1 & L2 RF Specification⁽¹⁾

	IN Opcomoal						
Parameter		Notes		Min	Тур	Max	Unit
Gain	The relative increase in signal power provided by the amplifier.			13.0	14.0	15.0	dB
High Isolated Gain	The relative increase in signal power provided by the amplifier when the device is high isolated.			-2.0	0.0	2.0	dB
Input SWR	Input Standing Wave Ratio: S11				1.5:1	2.0:1	-
Output SWR	Output Standing Wave Ratio: S22				1.5:1	2.0:1	-
Gain Flatness	The difference in loss or gain between the L1 and L2 frequencies.				0.5	1.0	dB
Amplitude Balance	The difference in gain or loss between each output port.					1.0	dB
Isolation	The amount of attenuation between two output ports.			L1:17 L2:12		L1:76 L2:71	dB
Group delay flatness	The difference in signal delay between the L1 and L2 frequencies.				1		ns
Input P1dB	The 1dB compression point.				-23.5		dBm
(1): Perform	nance is slightly reduced a	around GPS L5. If working on sensitive L5 application	ons, please r	equest pe	erforman	ce data.	
		External Power Options (Networked Option)					
		Voltage Input		Style			
		110VAC	Trans	Transformer (ITA Type A Wall Mount)			
Source Voltage Options		220VAC	Trans	Transformer (ITA Type C Wall Mount)			
		240VAC (United Kingdom)	Trans	Transformer (ITA Type G Wall Mount)			
		Customer Supplied DC 9-32 VDC	MIL-DTL-	DTL-5015 10SL DC Connector (Includes Mate)			
Output Voltage Options ⁽¹⁾		DC Voltage Out	Max Cur	Max Current out For Corresponding Vout			
		3.3 V		110mA			
		5V		130mA			
		9V		140mA			
		12V		180mA			
		15V		220mA			
		Custom		Custom			

	Custom	Custom		
Standard DC Configuration without External Power Option				
J1/Output 1 Pass DC, J2-J16/Output 2-16 Block DC, Input Pass DC				
Standard DC Configuration with any External Power Option (AC/DC or Military DC)				
All Outputs DC Blocked with 200Ω load standard				
Any port can be custom selected to Pass or Block DC				
	Connector Style	Charge		
	Type N-female	No Charge		
Constant Ontions	Type SMA-female	No Charge		
Connector Options	Type TNC-female	No Charge		
	Type BNC-female	No Charge

Performance

RMALDCBS1X16 (Standard Gain)

Each RMALDCBS1X16 ships with a test sheet that verifies critical performance characteristics, such as gain, input VSWR, and amplitude balance; a typical VNA test sheet is shown below.

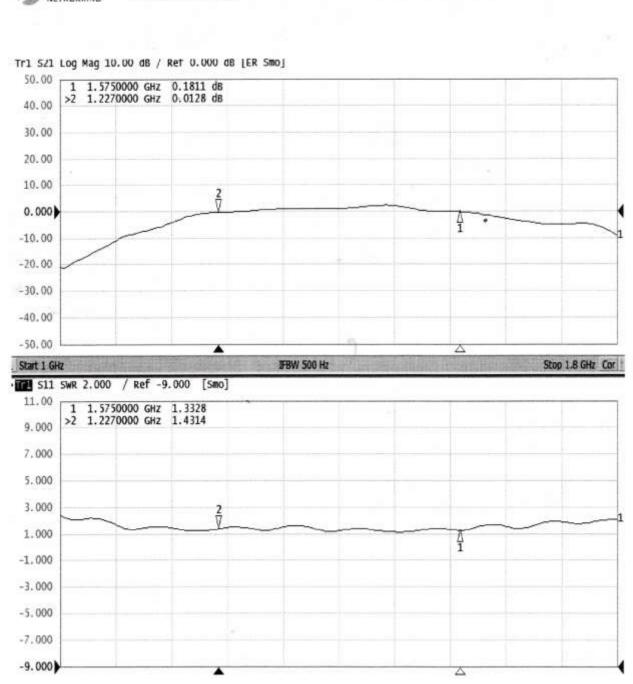

-il

HIRMALDCBS1X16 (High Isolation Typical Gain)

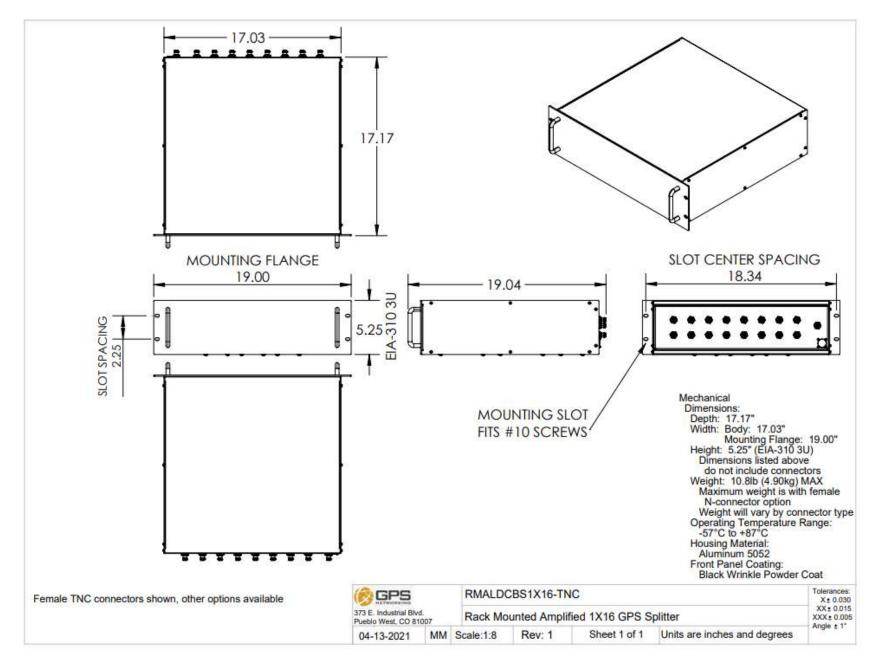

Test Data

Each HIRMALDCBS1X16 ships with a test sheet that verifies critical performance characteristics, such as gain, input VSWR, and amplitude balance; a typical VNA test sheet is shown below.
